To Whom It May Concern

STADIUM AUSTRALIA PROJECT

Central Signs were engaged by Multiplex Constructions to produce and install signage for the new Stadium at Homebush Bay. Works included statutory signage as well as all directional and locational signage to a value of around \$700,000.

Even with a tight timeframe and over 3500 signs to produce Central Signs at all times approached the project with enthusiasm and professionalism. Their particular attention to detail during the finalisation of the construction documentation ensured that the signage design and content was correct prior to manufacture resulting in minimal variations.

Central Signs positive attitude to the task at hand and in particular of their installers ensured that signage was completed on time for the opening event the NRL Double Header on 6/3/99. The completion of the signage certainly added that finishing touch to the Stadium – an all-important component for the public who had to negotiate their way around a new building at the first event.

On the basis of our experience with them I would have no hesitation in recommending Central Signs to any prospective Clients.

Yours faithfully
